

# JACOB CASSANI

## TECHNICAL PRODUCT MANAGER

- Email: cassrica@protonmail.com (Primary) | cassani@cimai.biz (Professional)
- Phone: +1 406 304 2861 (USA) | +506 6175 8500 (Costa Rica)
- LinkedIn: [Jake Cassani](#)
- GitHub: [Primary Repos](#) | [Anonymous Contributions](#)
- Location: Puerto Viejo de Talamanca, Limón Province, Costa Rica

### PROFILE

Accomplished Technical Product Manager with extensive experience in blockchain technology, decentralization, and Web3 ecosystems. Proven expertise in tokenomics design, end-to-end product lifecycle management, and driving innovative solutions in startups and technical environments. Adept at bridging technical and business goals to deliver impactful outcomes. Passionate about fostering collaboration across diverse teams, advancing privacy-preserving technologies, and strengthening blockchain security.

### TECHNICAL SKILLS

- Blockchain Strategy & Implementation
- Tokenomics Design & Analysis
- Data Analysis, Statistical Modeling, and Machine Learning
- Web3 Technologies: NFTs, DeFi, L1/L2 Blockchains
- Cross-Functional Team Leadership
- Stakeholder Communication & Collaboration
- Programming: Python, TypeScript, Rust, SQL
- Project Management Tools (e.g., Jira, Zenhub)
- Market Research & Problem-Solving

### PROFESSIONAL EXPERIENCE

#### Cimai (Founder & Developer) Jan 2024 - Present

- 2024 – Present
- Conceptualized, designed, and developed a decentralized gaming platform with a working ecosystem integrating blockchain, token economies, and privacy-preserving mechanisms.
  - Built the platform's codebase entirely, showcasing hands-on technical proficiency in Python, TypeScript, and Rust ([GitHub Repository](#)).
  - Fostered community engagement through comprehensive technical documentation ([Quickstart Guide](#)).
  - Gained hands-on experience in every phase of product development, from ideation to deployment, positioning the project as a model for decentralized innovation.

#### Acxyn (Chief Blockchain Officer)

- 2022 – 2024
- Directed Web3 integration strategies, blending blockchain, NFTs, and DeFi into gaming products.
  - Designed and implemented IP tokenization frameworks, enabling the tokenization of gaming assets for blockchain-based trading.
  - Collaborated with developers, artists, and blockchain experts to deliver a cohesive and secure ecosystem.
  - Ensured compliance with evolving blockchain regulations and established robust security measures to protect assets and users.
  - Engaged gaming communities through partnerships, boosting adoption and awareness of Acxyn's vision.
  - Learn more: [Acxyn Website](#).

#### LongTail Financial (Chief Technological Officer)

- 2021 – 2022
- Played a key role in developing [NVAL](#), an innovative platform for NFT pricing and analytics.
  - Led AI-based token engineering initiatives to design and optimize token economies for blockchain protocols.
  - Delivered actionable analytics tools to assess and enhance the performance of tokenized systems.
  - Supported the deployment of cutting-edge blockchain solutions tailored to client needs, combining AI and data science.

### EDUCATION

#### I did it in the field.

- Oil & Gas Industry (Field Engineer & Directional Driller)  
2004 – 2020
- Progressive Career Advancement: Advanced from Field Engineer to Directional Driller over 16 years, undertaking increasing responsibilities in complex drilling operations across diverse projects.
  - Collaboration with Industry Leaders: Worked with major drilling companies, including Nabors Industries, Helmerich & Payne (H&P), Cyclone Drilling, Bronco Drilling (later Nomac), and Caza Drilling (which evolved into Ensign Energy Services).
  - Field Engineering Expertise: Installed and maintained advanced drilling equipment, conducted routine inspections, and ensured operational efficiency in some of the most challenging field conditions.
  - Directional Drilling Proficiency: Executed precise horizontal and directional drilling techniques to access targeted oil and gas reserves, optimizing resource extraction and minimizing environmental impact.
  - Integration of Advanced Technologies: Collaborated extensively with [Schlumberger's Artificial Intelligence Solutions](#), leveraging AI-driven analytics to enhance exploratory drilling precision and efficiency in horizontal wellbore operations.
  - Leadership and Team Management: Directed cross-functional teams, including engineers, geologists, and equipment operators, ensuring seamless collaboration and project success.
  - Safety and Compliance: Maintained strict adherence to safety protocols and regulatory standards, safeguarding team members and the environment while ensuring project completion.
  - Problem-Solving in High-Pressure Environments: Addressed and resolved complex challenges in dynamic field conditions, demonstrating resilience, adaptability, and critical thinking.
